About

I am a Laravel developer with solid experience in both backend and frontend work. I use Laravel, Shopify, MySQL, Github and Tailwind CSS to build websites that are easy to use and look great on every device. I focus on writing clean, efficient code to turn ideas into reality. I'm always learning new things to improve my work. Check out my portfolio to see what I've done, and let's create something amazing together!

Skills & Competencies

Laravel   TailwindCSS

Shopify   Bootstrap   Github

HTML5   CSS3   JavaScript

Professional Experience

Car Wash Management System

Developed a Car Wash Management System that allows users to register their vehicles for washing services. Implemented real-time price fetching based on user roles, ensuring that car wash centers can dynamically set their own prices for two-wheelers and four-wheelers.

Applied validation to ensure correct data entry and real-time validation for required fields.

Library Management System

- Designed and developed a Library Management System using Laravel and PHP.
- Implemented key features like add book, issue/return tracking, and user authentication.
- Created a responsive and user-friendly interface using HTML, CSS (Tailwind), and JavaScript.
- Optimized database queries for faster data retrieval and better performance.
- Ensured secure login and role-based access control for students and administrators.

Education

Bachelor of Computer Applications (BCA)
Dr. Subhash University Junagadh present
 SGPA: 9.50

Certifications

New India Vibrant Hackathon Finalist

I'm thrilled to share with you that I recently participated in the Grand Final of "New India Vibrant Hackathon - 2023". This experience has been a priceless journey.

During this journey, I had the opportunity to learn new programming languages, and I've come to understand that every challenge is an opportunity to learn.

Final Selected and represent our university in Gandhinagar
